and AsiaPac**

Vinay Nagpal | Brief Bio

Vinay has over 23 years of experience developing product and technology solutions in data centers with a strong focus on networking, connectivity, subsea and terrestrial fiber systems.

Currently, Vinay is the President of InterGlobix LLC. which provides data center consultancy and marketing services globally. Most recently, Vinay was Vice President of Product Management at Digital Realty/DuPont Fabros (DFT) where he was responsible for product development, product management and lifecycle management of DFT's Hyperscale product, Interconnection and Managed Services. Vinay was responsible for growing the company's carrier-neutral data center connectivity and peering services and supporting customers' networking requirements.

Prior to DFT, Vinay held several senior-level network-centric positions in product management and product development at Tata Communications, Verizon, MCI, Digex and UUNET productizing data center services across multiple geographies in US, Canada, London, Singapore, Australia and India.

Vinay served on the board of Open-IX Association and has been involved in building global open standards for Interconnection. Being on the Leadership Board of NVTC Data Center & Cloud Committee, Vinay actively participates in the region's data center and connectivity initiatives. Vinay also serves on the LINX NoVA Customer Advisory Board, and on NVTC's Executive Circle providing advice to NVTC Board of Directors.

Vinay has an MBA a Master of Business in Information Systems, a B.S. in Computer Science and an ITIL certification. He authored white papers, blogs, and industry publications on data center and connectivity and has been a featured speaker on data centers and connectivity at industry events.
