

BIOGRAPHY

DeAnthony L. Heart

Mr. DeAnthony Heart is currently a Senior Systems Engineer at The MITRE Corporation, a not-for-profit company devoted to the operation of science and engineering Research & Development centers. Mr. Heart received his B.S. in Aerospace Engineering and Masters in Systems Engineering from Virginia Tech and Penn State respectively. His previous roles include serving as a technical project manager at Northrop Grumman and in J.P. Morgan Chase's Global Technology. Mr. Heart is dedicated to building the STEM pipeline serving as the Washington Metro Area International Council on Systems Engineering's (WMA INCOSE) first STEM Chair and as MITRE's Mentoring Outreach Director leading to the establishment of several partnerships within his community. While at MITRE, Mr. Heart has thrived in his commitment to public service and technical excellence, working in the public interest and being a trusted advisor to numerous federal agencies. He is a talented Systems Engineer and more importantly a community leader which is reflected in his recent award of Black Engineer of the Year 2015. Today Mr. Heart leads a 500-member organization established to aid the development of early career professionals at MITRE. He also serves as chair of the Northern Virginia Technology Council's NextGen committee. A committee dedicated to making northern Virginia a vibrant and attractive place for early career professionals.
